Customization:

We are using latest CSS coding standard. Custom Style written into style.css which is override Bootstrap style somewhere else. Responsive style written into responsive.css.

style.css file contains all of the specific styling for the template. Here is an example of general style which is specify using following label:

```
/*
=======================================================================
Index
-----------------------------------------------------------------------

# - 1.0 - General styles

# - 2.0 - Left-blcok styles

# - 3.0 - Right-block styles
# - 3.1 - Count down styles
# - 3.2 - Contact styles
# - 3.3 - Social-icon styles

# - 4.0 - layout styles

*/
```

If you would like to edit a specific section of the site, simply find the appropriate label in the CSS file, and then scroll down until you find the appropriate style that needs to be edited.
